27th AISF PRE-MEETING COURSE 58th AISF ANNUAL MEETING

Il **27° Pre-Meeting AISF**, intitolato “Emergencies in Hepatology: A Critical Care Approach”, si concentra interamente sulla gestione delle urgenze epatologiche, che rappresentano una delle sfide più delicate e ad alto impatto nella pratica clinica quotidiana. Nonostante i notevoli progressi raggiunti nella diagnosi e nel trattamento delle malattie di fegato, esistono ancora numerose condizioni acute caratterizzate da un decorso rapidamente evolutivo, capaci di determinare una significativa morbidità e mortalità se non riconosciute tempestivamente.

Nel corso delle sessioni verranno affrontati i principali scenari critici dell’epatologia moderna: dall’insufficienza epatica acuta e acutamente scompensata alle complicanze improvvise della cirrosi, dalle forme tossicologiche e metaboliche severe ai quadri vascolari acuti, fino alla gestione del paziente epatologico in terapia intensiva, dove la collaborazione multidisciplinare assume un ruolo decisivo.

Il 27° Pre-Meeting AISF nasce quindi con l’obiettivo di fornire un aggiornamento completo, pratico e basato sulle migliori evidenze disponibili, dedicato alle situazioni in cui rapidità decisionale, competenze tecniche e capacità di lavorare in team diventano elementi essenziali.

Il **58° AISF Annual Meeting** si propone come un’occasione di aggiornamento sui progressi più significativi in ambito epatologico, finalizzata alla promozione di un confronto aperto tra clinici esperti, ricercatori e giovani epatologi.

Il programma scientifico, articolato in sessioni di aggiornamento, presentazioni di studi originali e discussioni multidisciplinari, affronta i principali temi di interesse della disciplina: dalle epatopatie croniche alle neoplasie del fegato e delle vie biliari, dalle innovazioni farmacologiche alle nuove metodologie diagnostiche e digitali.

L’evento intende promuovere una riflessione condivisa sulle esigenze che caratterizzano i percorsi di cura e le direzioni future della ricerca, sostenendo il ruolo dell’AISF come punto di riferimento per la comunità scientifica e per la formazione delle nuove generazioni di epatologi.
